

Hot Tip #25

Voice PRIs, Data Circuits & Integrated Circuits

Connectivity at its Greatest!

FiOS. U-Verse. VoIP. Voice PRIs. Data Circuits. With all of the new buzz words circulating lately, you may be beginning to wonder if your business is taking full advantage of the latest technologies. After all, in this day and age, business communications are primarily done over the internet. Everything ranging from sending email, making phone calls, attending virtual meetings and a slew of others, all conducted online, make your internet connection the lifeline of your business.

With that being said, take a moment to look at your own internet connection and determine if its qualities match your business' needs. How quickly can you access the web? A slow connection and insufficient bandwidth are both great reasons to consider a circuit for your business. Check out some other benefits of T1 circuits:

- **Reliable:** Fast and responsive for mission-critical uptime and performance
- **Priority Routing:** T1 traffic is prioritized on the nationwide network
- **Expert Support:** Specialized T1 service team available to you 24x7x365, providing priority response time

In addition to these benefits, circuits are available in a variety of types to ensure you receive a customized solution for your specific communication and connectivity needs. Does your business have a high volume of calls? A voice PRI allows for 23 simultaneous calls with unparalleled, clear quality. Need more bandwidth? Consider a dedicated circuit, with speeds guaranteed from 1.5 MBPS and up. Or, if your business is ready to move to VoIP, customize a solution with an integrated voice and data circuit.

ITS has extended its circuit promotion! Between now and December 31,2010, clients who purchase a new voice PRI or integrated circuit will receive 20,000 FREE local minutes per circuit/per month, for the entire term of the agreement. With the prices of bandwidth dropping, **now** is the best time to look into a circuit for your business!

Not sure whether or not your business would benefit from a T1, or which would be right for you? Please call 800.876.4ITS (4487) for a communication system analysis today!

ITS realizes that these days all businesses are looking for ways to save money and improve efficiencies. In response to this, ITS has put together this Hot Tips mailing with the goal of providing our customers tips on how to save money or improve efficiencies in their business. You can look forward to a new Hot Tip in your mailbox every month.

At ITS, we truly value our customers and are committed to helping you with your communications and networking solutions by being your telemangement expert so that you can focus on what you do best and not worry about technology getting in the way. If you have ideas you would like us to explore further or would just like to send us feedback, please send an email to HotTips@its-omni.com.
